You and [Prathviraj Chouhan](#)

## Recognised for "Focus on businesses and projects where we can excel"

CAMS settlement and TRIUMP integration changes are in OAT for August Delivery. I want to take this opportunity to thank you both for the excellent work done. There have been no defects logged in CIT and SIT for the feature which is a reflection of the high level of standards followed. Rework due to bug/issues is a big hurdle in planning and you have been able to limit those due to your consistency of development practices and reviews. Another great example of been consistently excellent.
