**Recognised for "Simplicity and efficiency, seeking out every opportunity to automate"**  
Dear Team Code Slash, Just wanted to Thank You! for participating in the BUK Tech & Ops Transformation Code-a-thon Phase 3 and attempting to solve a real life problem. While your team didn't make it as a finalist, I must say the knockout round was not only challenging for the Mentors, CTO and Business PO, but also very insightful, indeed. Greatly appreciate your enthusiasm and passion to make a difference, by going the extra mile to come up with a creative solution approach for BFA Backoffice Workflow. There's a pipeline of next phase of the Code-a-thon Problems building up, so stay tuned and keep up the enthusiasm, there's more excitement in store.
