

Focus on businesses and projects where we can excel

September 05 2024 12:10 am

You, [Amit Gupta](#), [Ankit Maheshwari](#), [Sagun A Kasale](#), [Karmesh Duggar](#), [Anisha Anisha](#) and [Priyanka Jain](#)

Recognised for "Focus on businesses and projects where we can excel"

For Account Swap, it was a very tough to achieve the given timeline to setup ECS with API Gateway and host an API on ECS cluster on SIT environment. It was totally new and quite big setup and involved many interdependent resource creation.

Setting up the API Gateway require to create the Custom Domain, setting up API Gateway, Mapping the Domain, creating VPC link, setting up Lambda Authorizer, Network and application Load balancers with SSL certificates. Once all these setup done then creating the ECS cluster and hosting the API on it.

It couldn't be happened if we have not get the help and guidance from Amit, Sagun and Abhijit.

Thanks Amit, Sagun and Abhijit for helping us and guiding us in the right direction, without your help it won't be possible to achieve the timeline.

I would also like to thanks Anisha, Priyanka, Ankit, Karmesh, Raveendra and Mandar for all your efforts, hard work and dedications to complete this on time.

Thanks ALL...!! Much Appreciated .
