

Diversity of thought, championing new thinking and challenging the status quo

October 28 2024 02:25 pm

You, [Shreya Singh](#) and [Avirup Chattaraj](#)

Recognised for "Diversity of thought, championing new thinking and challenging the status quo"

Avirup and Abhijit - Fabulous work in optimizing code of apply domain for building on the multi product enablement feature in apply domain. Your work with key detailing related to usage of java features for checking on memory leaks, spring and lambda initializations, aws native in carving out the common lambda thin jar, lambda deployment templates and inputs related to pipelines maturity has really been a key for starting onboarding garage work for the installment journey.

Shreya - very well done in starting some major changes in the jenkins pipelines to support another product(installments) in apply, making it much more mature and extensible plus dev/test friendly, contributions in artifact tagging, nexus tagging - you have been very versatile and truly agile in making the changes with quality delivery
